TROY Security Toner

Protect **important documents** with TROY **Security**

Secure your Documents using an HP LaserJet or TROY Printer

It is estimated that every day 1.2 million fraudulent cheques are written.* TROY MICR Toner Secure™, a patented solution, helps protect cheques and negotiable documents against chemical alteration.

* According to "Protection Against Cheque Fraud"available at www.abagnale.com

Protect the Integrity of your medical documents

Government regulations have changed in the Health Care industry in attempt to protect patient rights. Documents pass through the hands of more patients in attempt to protect patient confidentiality; leaving the opportunity for fraudulent alteration or unauthorised copying of patient documents.

Verify Records with TROY Security Toner

Headline news over the past few years has reported numerous problems with the integrity of corporate records. TROY Security Toner can be used as a form of authentication on any document printed using a Hewlett-Packard LaserJet printer.

- TROY's patented Special toner formula forces a bright red stain to appear if chemical alteration is attempted. Any solvent that will remove toner will release the dye.
- High adhesion toner formula makes it more difficult to remove toner using mechanical alteration.
- Simple and easy confirmation of document authenticity.
- TROY Security Toner protects the characters and graphics on documents. Print using either plain or security paper.

Helps limit growing financial losses and other business risks associated with fraud

For over 30 years TROY has provided specialized printing solutions to banks, corporations and government institutions.
